

Bubble Tube Bracket

This bracket is designed to keep your bubble tube safe from gently knocks and accidental spills. This bracket is not strong enough to prevent strong tugging on the tube or any other force applied to the bracket. We supply screws and wall plugs with this product but this may not be suitable for all wall types. This bracket must be installed by a professional and the correct screws and plugs used depending on the wall.

If you have any questions regarding your bubble tube or the bracket, please email us on emailsupport@playlearnusa.com
